Seed & Olive Collecting Nets

UV-stabilized HDPE collecting nets for olives, nuts and seeds—lightweight, durable and hygienic for faster harvesting. Available from STIPL Agritech (GreenPro).

Lightweight, UV-stabilized nets for clean fruit and seed harvesting

Durable HDPE collecting nets that reduce fruit damage, improve hygiene and speed up orchard/seed operations.

Seed & Olive Collecting Nets are purpose-built, UV-stabilized HDPE meshes designed to catch fruits, nuts and seeds during shaking, beating or natural drop. They minimize bruising, keep the harvest clean and speed up collection with less labor.

- **Material:** HDPE monofilament/tape knit, UV-stabilized
- **GSM range:** ~50–120 gsm (model-dependent)
- **Mesh:** Open mesh for quick shake-through & debris shedding
- **Edges:** Reinforced borders; optional eyelets/handles
- **Colors:** Green, Black (others on request)

Applications

- Olive and nut harvesting (almond, walnut, etc.)
- Seed collection in forestry and plantations
- Fruit-catching mats during pruning or thinning

Advantages

- Reduces fruit bruising and contamination vs. ground collection
- Lightweight, tear-resistant and easy to deploy/reuse
- Faster cleanup; easy shaking and funneling into crates

Usage Tip: Spread nets around the trunk with slight slope toward a collection point; avoid sharp stones; clean and dry before storage.

Clean Harvesting
Catches olives and seeds with minimal bruising.

Labor Efficiency
Speeds up collection with durable HDPE nets.

Reusable Design
UV-stabilized nets for multiple harvest seasons.
